

A better club for work and play.

- ✓ **Improve collaboration & consistency**
- ✓ **Engage staff & members**
- ✓ **Automate processes for operational efficiency**

Use Club Core to provide the best experience to every staff member, meeting their expectations - without adding hours to your day.

Club Core is the only club software that helps General Managers take charge of staff communication and collaboration, training and board relations while managing club and member issues more efficiently.

Staff Training

Preloaded with field-tested training courses and micro-learning videos

HR Docs & Automated Onboarding

Ramp up staff quickly (even without an HR team) while meeting employment standards

Board Collaboration

Tools to collaborate with and onboard new committee members

Centralized Communications Hub

Reach employees using an app with 2-way communication, training and critical documents

Management Tools

Automate workflows and build operational efficiencies

Build a better club experience for employees with Club Core.

STAFF

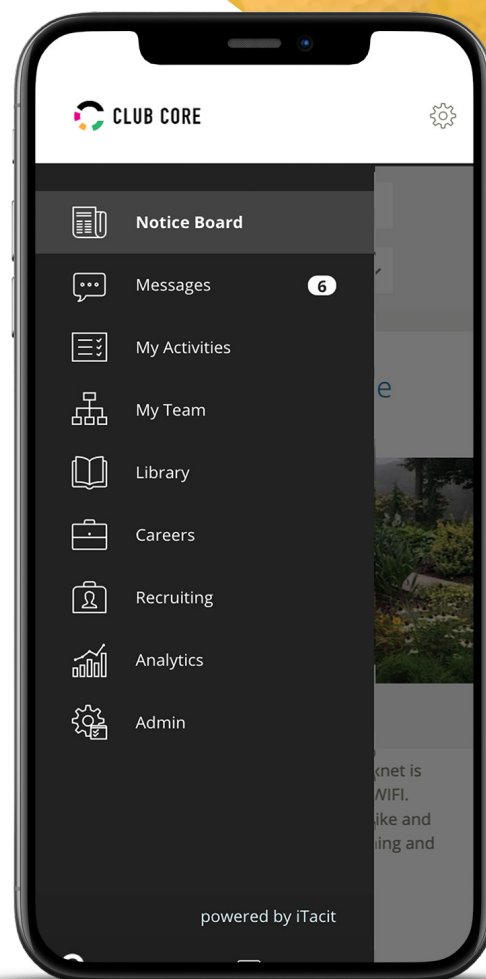

- Online employee records
- Employee social intranet for central communication
- Automated training programs and content by role
- Direct messaging without the cost of email
- 'To-Do' lists and activity tracking
- Stay current with events and activities

MANAGERS

- Keep their team up-to-date with skills and information
- Assign tasks and track status
- Communicate directly, or collaborate with their team
- Automate repetitive tasks and processes

BOARD & COMMITTEES

- Review key instructions on administration and organizations
- Learn about policies and procedures
- Communication threads to keep conversations organized
- Easy access to reports and analytics

NOT JUST CLUB SOFTWARE, A BETTER CLUB EXPERIENCE.

Other club software is great for your operational needs like POS and tee sheets, but doesn't help to enhance a club culture.

Club Core can integrate seamlessly with your other club management tools – just link to your employee roster and you're ready to go.
